Business Solutions for
Maximum Performance

Acumatica Summit 2021

Advanced Revenue Management

Recurring revenue, subscription, contract, billing, and payment management

The Advanced Revenue Management (ARM) Suite is a collection of modules that supports you through the entire subscription lifecycle to help improve your cash flow, billing accuracy, and customer satisfaction with flexibility and automation capabilities.

Advanced Payments

Comprehensive payment automation with support for ACH/SEPA/BACS, credit card payments, multiple currencies, and automatic retries.

Advanced Billing

The most flexible and powerful contract and repetitive billing system available, including support for automated invoice creation, proration, usage-based (metered) billing, revenue recognition.

Advanced Analytics

Extensive analytical measurement and models enable you to visualize your data to surface insights and optimize decision making.

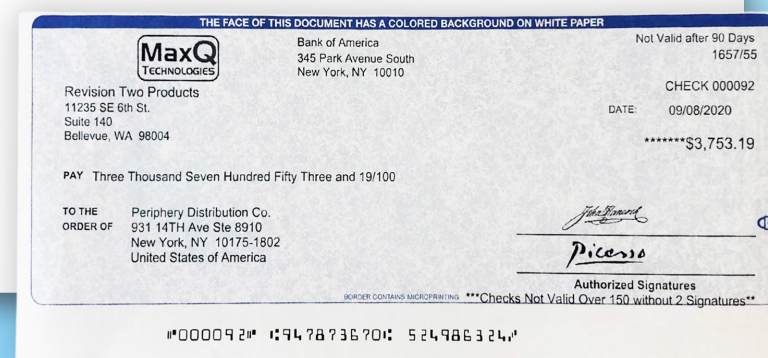

AP/PR Laser Checks with Positive Pay

Realize significant time and cost savings by printing accounts payable (AP) and payroll (PR) checks on blank stock rather than preprinted checks.

- Save time and money by eliminating the need to buy, order, and store costly preprinted checks
- Increase security through easy-to-set security measures
- MICR fonts allow for printed checks to include account number, routing number, and unique check number

Now with integrated Positive Pay which automatically sends a list of issued checks to the bank for comparison against checks presented for payment.

MaxQ Cannabis

A complete ERP solution that manages your cannabis supply chain from seed to sale

MaxQ Cannabis provides the integrated functionality and automation needed to optimize operations throughout all phases of the cannabis industry.

Cultivation

Gain control over your planning and operations with complete traceability and cost analysis, allowing you to maximize yields and minimize costs.

Manufacturing and Processing

Easily handle the complicated process of cannabis extraction and manufacturing while streamlining the production, tracking, packaging, and labeling of products.

Distribution

Manage your supply chain to improve inventory management, sales management, and future planning, allowing you to increase sales while staying compliant.

Analytics

Monitor key metrics to track costs, perform forecasts, and maximize profitability for better decision-making across your organization.

Compliance

Automate compliance tracking and reporting with a system that provides full traceability with automated audit trails, accounting processes, and product tracking.

Integrations

To ensure that we are providing a complete, efficient solution, we have partnered with the most popular integrations in the industry.
